

Certified Phlebotomy Technician Training: \$1250.00

Phlebotomists are health care professionals who draw blood and other specimens from patients or blood donors for medical testing and processing. Phlebotomists work in hospitals, HMOs, home health agencies, clinics, large medical offices, laboratories, and blood banks. The demand for phlebotomists is rising. Increased population growth and the number of laboratory tests ordered by physicians due to advances in biotechnology have contributed to the demand. This certificate program includes classroom & lab instruction followed by an internship where the student will get the opportunity to further develop these critical workplace skills. The courses that comprise the program are Introduction to Phlebotomy, Medical Law and Ethics, Medical Terminology, Asepsis and Infection Control, CPR and First Aid, Blood Collection Procedures, Specimen collection (non-blood) and Occupational Communication. This course prepares you to sit for the Certified Phlebotomy Technician (CPT) exam. The CPT is a national credential for the Phlebotomy Technician profession. Certification through the National Health Career Association recognizes the competency and proficiency of a clinical individual and is accredited by the National Commission for Certifying Agencies (NCCA).

Certified EKG Technician (CET) 2 and 4 Year National Certification Course: 2 years \$189...4 years...\$289

As a Certified EKG Technician (CET), you'll perform meaningful work in helping diagnose cardiovascular conditions. EKG Technicians assist physicians in the diagnosis and treatment of various cardiovascular problems. Areas of practice for cardiovascular technologists include invasive cardiology, vascular cardiology, and echocardiography. An EKG technician is someone who works in the field of echocardiography. According to the Occupational Outlook Handbook, the expected growth for EKG technicians is anticipated to be about 24% from 2018-2028.

The fee charged for the Two Year National EKG Certification:

\$189.00-2 Year EKG Certification Digital Copy- By Email

\$289.00-2 Year EKG Certification Digital & Hard Copy -By Email and Mail.

Why EKG Certification is necessary?

Hospitals, Emergency Rooms, Medical Examining Facilities and Medical Offices all over the United States are extremely short-staffed. Oftentimes patients do not get the attention of doctors that could save lives because they get too caught up doing paperwork or conducting simple yet time-consuming medical exams. EKG is one such exam where doctors need help EKG Technician in saving time. EKG technicians interact with patients, conduct EKG tests and prepare EKG exam results.

With the help of EKG technicians, Doctors can save time to save more lives and EKG technicians receive important medical experience and often an increase in compensation from employers. The Standard CPR & AED course is a general workplace course for those who need CPR certification for their job or to meet OSHA requirements. This commonly includes parents, middle and high school students, & more.

Online certificate program designed for Medical Assistants and other interested unlicensed assistive personnel: \$350

The growth of the use of Unlicensed Assistive Personnel (UAP) is a trend in our society. Unlicensed individuals are now performing procedures that have traditionally required a license. Unlicensed Assistive Personnel (UAP) refers to those healthcare workers who are trained to function in a supportive role by providing patient care activities as delegated by an RN or physician, but are not licensed to perform nursing tasks; it also refers to those healthcare workers who may be trained and certified, but are not licensed. Examples of unlicensed assistive personnel include (but are not limited to) certified medical assistants, certified nursing assistants, patient care technicians, phlebotomists, dialysis technicians, anesthesia technicians/technologists, and emergency medical technicians.

This 11-hour IV Therapy Certificate Program (often referred to as “IV Certification”) is designed to provide Medical Assistants (and other unlicensed healthcare personnel) with an introduction and overview of IV therapy, including current standards of practice, special patient populations, legal aspects, a comprehensive review of current peripheral venous access devices and the peripheral IV catheter insertion procedure, as well as site care and maintenance recommendations. IV medication & fluid administration considerations are also discussed.

IV Therapy Education: \$320.00

Designed for: Individual Use: Who May Purchase This Program: RN's & LPN's (whose State Board of Nursing does not require a specific number of hours or hands-on practice to be included in the course curriculum) This course meets the requirement for FLORIDA LPN's only when paired with our 4-hour IV Skills Lab for Nurses.

PROGRAM LENGTH: 28 Hours

We recommend that this online course be followed by skills practice/validation with a qualified clinical preceptor at your place of employment. When the IV Therapy Education online program is purchased, you will be sent an email (within 1-2 business days) with instructions and a link to access the program. Once you log in to the program, you will be able to print out the course workbook. There will be a Post Test following the Program. Upon successful completion, a Certificate of Completion (reflecting contact hours for nurses) will automatically be emailed to the individual who purchased the program. **NOTE: The practice of IV Therapy must be performed according to an individual's State scope of practice for their discipline and/or level of licensure. It is the responsibility of each participant to maintain his or her level of proficiency on an annual basis.**

Geriatric I.V. Therapy: Age 65 & Beyond: \$149.00

Designed for: Individual Use

This program was designed to educate healthcare providers about the difference between geriatric patients and other adults in terms of health care needs. Content includes the major normal physiologic changes in the geriatric patient; positive nursing actions that will promote proper I.V. therapy practice; appropriate interventions for major complications associated with I.V. therapy practice; proper venipuncture procedural steps to successfully access the geriatric patient's veins; and the potential complications related to the administration of I.V. medications and I.V. fluids in the geriatric patient.

PROGRAM LENGTH: 1.5 Hours

Fundamentals of Current I.V. Therapy: \$149.00

Designed for: Individual Use

Who May Purchase This Program: Nurses and other interested healthcare personnel

PROGRAM LENGTH: 11 Hours

We strongly recommend that this online course be followed by supervised hands-on skills practice/validation with a qualified clinical preceptor at your place of employment.

Legal Aspects of Infusion Therapy: \$149.00

Designed for: Individual Use

Who May Purchase This Program: Any healthcare provider who practices IV therapy

PROGRAM LENGTH: 1.5 Hours
